Army Training and Readiness

GENERAL JOHN N. ABRAMS

COMMANDING GENERAL, US ARMY TRADOC

What It's All About

The U.S. Army is the world's best -- it' about keeping it that way!

- As we move into the future and push more power into the hands of fewer people in smaller organizations, the importance of each individual's contribution and effectiveness will increase.

- As military hardware becomes more complex and costly, it will become increasingly important that soldiers be capable of exploiting its full potential.

At the heart of the Army are its people.

Improved Capability

Increasing force effectiveness

Using Info Tech to Improve Capability

- Operate in network
- Integration of combined arms
- Anticipate needs and actions-- be able to improvise
- Know blue relative to red
- Faster tempo - greater decisive capability

Info technologies:

- Assist problem solving
- Reduce human fatigue or cognitive skills application
- Plan and execute in parallel or simultaneously at multi-echelons
- Joint symbology - readiness/effects/intentions both blue and red
- Sensor shooter interface
